SUBJECT: CORRECTED APPLICATION PAPERS (CLAIMS) & (ABSTRACT)

Dear Commissioner,

Thank you for informing me of my oversight with regards to my original and amended application. On my previous amendment (5/20) I thought I had sent the Abstract on a separate sheet per your instructions that I received prior to this (6/23) notice.

In any event I am re-sending both of your copies and the separate sheets for each corrected item requested. I am also enclosing a complete typed application with no changes other than to place the claims and abstract on there own separate sheets in the proper numerical page order. I am also providing this as a CD download of the complete filing, including drawings, in the same corrected format without any other changes.

I trust that I have completed this correctly. I truly appreciate the opportunity that the USPTO has provided me. Financially I am without any support and can not support any professional assistance at this time. I have also enclosed a photo of one of the finished designs. It is impressive, It works as intended, and everyone that sees it is praising it's versatilities. One model is short handle version and the other is the long handle version. Both are telescoping. Each unit is adjustable for any shooting angle, provide proper ball clearance, shooting aperture is center to all aiming points. It is a remarkable when used to execute Jump Shots and/or any other long or short pool shots.

Thanking You In advance, I Am

*William H. Walton*
